If your bucket begins to smell, just toss in some wood shavings, paper shreds, or dry leaves.

Dear Neighbor,

Some of us in the neighborhood are doing a compost challenge for the next eight weeks to see how many gallons of vegetable scraps and other compostables we can divert from the landfill.

Would you join us?

Instead of tossing your compostables away, you just put it in the bucket, and we'll swap it out with a fresh bucket every other week.
